PERSONAL

Date of birth: 28 / 7 / 2002

Nationality: Palestinian

Languages: Arabic, English

ABOUT ME

I am a passionate frontend developer with a unique background in medicine. My journey began as a medical student, where I honed my analytical and problem-solving skills. However, my growing interest in technology led me to pivot my career to software development, where I found my true calling.

I specialize in creating intuitive and visually appealing user interfaces using JavaScript. With strong project management and creative thinking abilities, I excel at translating complex ideas into seamless digital experiences. I am currently focused on building impactful projects and continuing to grow as a developer.

ACHIVEMENTS

- First place in a math competition (6th grade).
- First place in "Schools Got Talent" for two consecutive years (7th and 8th grades).
- Achieved 97% as a final score in 12 English levels.

EDUCATION

Foundation Years (2008–2018):

Attended AlNusirate Elementary and Middle Schools and AlBurajj Elementary School, consistently excelling academically and ranking at the top of the class throughout.

High School Excellence (2018–2020):

Studied at Khaled Ibn Alwaleed High School and Alsalah Benevolent School, graduating with a 98% score while maintaining a top ranking among peers.

Medical Journey (2020–2023):

Pursued a degree in medicine at the Islamic University of Gaza, gaining a solid foundation in analytical thinking and scientific knowledge.

Engineering Pathway (2023–Present):

Currently studying computer engineering at Al-Azhar University of Gaza, combining problem-solving skills with a passion for technology.

EXPERIENCE

Frontend Development Coursework:

Built foundational skills in HTML, CSS, and JavaScript through hands-on assignments and projects.

University Tech Initiatives:

Assisted peers with coding assignments and led group projects in web development, demonstrating leadership and technical skills.

Educational Video Creator (2024 – Present):

Produce and share educational videos on YouTube to help university students understand complex topics, showcasing effective communication and teaching abilities.
